LIST _____

DATE: January 23, 1997

REPLY TO
ATTN OF: EF-21:Vranicar

SUBJECT: **FERNALD MATERIAL DISPOSITION**

TO: Jack Craig, Manager, Fernald Area Office

As you are aware, there have been recent discussions between our staffs regarding the consideration of Portsmouth as a potential recipient of uranium bearing material from Fernald. Portsmouth is committed to assist you as much as possible with this task; however, support for this endeavor is not currently within the funded scope of work for Portsmouth. Consequently, it is difficult to explore the many intricate issues associated with such an undertaking. If Portsmouth is a potential candidate for receipt of material, I am asking that you approach the appropriate program offices (NE, DP, EM) with the idea to obtain direction and funding for Portsmouth to proceed with necessary supporting groundwork. Without such, Portsmouth cannot provide you and the department effective support.
