Maggie Merritt
[REDACTED]

Dear Ms. Merritt:

Thank you for your interest in the environmental study underway at the Feed Materials Production Center. We appreciate your participation in the January 1989 community meeting.

We know it's been a while since you commented about the sound system we used at the Ross Middle School. In reality, we've used that time to make a few changes to ensure that everyone will be able to hear the speakers at the spring community meeting in the Ross Middle School on May 15.

The spring meeting will feature some slight changes in the meeting format, as well as an improved sound system. For example, there will be a panel to answer questions from the entire audience following the technical sessions. These changes are based on feedback we received from interested area residents like yourself.

Thank you for helping to make these community meetings more effective. We hope to see you May 15.

Sincerely,

James A. Reafsnyder
