Reference: Certified Operator Compliance

This letter acknowledges the receipt of your operational status report dated December 8, 1994.

Review of your report indicates that your water system's plant and distribution facilities are currently under combined supervisory control. Further review indicates your public water system to be in compliance with the "certified operator" requirements of Rule 3745-7-02 of the Ohio Administrative Code and the system's classification issued November 1, 1994.

Your letter indicates that Jeffrey Hensley, [REDACTED] is the person in "responsible charge" of the water system. Any changes in personnel "in responsible charge" of your water system or any part thereof, is to be promptly reported in writing to the Ohio Environmental Protection Agency, Division of Drinking and Ground Waters.

All water purveyors are urged to encourage their operating personnel to obtain operator certification. Such action will not only improve their system's overall operating capability, but will provide the system with a backup pool of certified operators to meet future supervisory needs to maintain continuous compliance.

Sincerely,

John J. Sadzewicz, P.E., Chief
Division of Drinking and Ground Waters
