RE: OU 1 Site Preparation
Activities

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) letter regarding Operable Unit (OU) 1 site preparation activities and materials management. The letter provides a schedule and drawing of site preparation activities necessary to prepare the OU 1 site for construction and operation of remediation facilities.

U.S. DOE requested approval to begin construction prior to U.S. EPA's approval of the pre-final design package.

U.S. EPA concurs with U.S. DOE's request to expedite OU 1 activities.
