RE: OU 5 Remedial  
Design Work Plan

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) draft final Operable Unit (OU) 5 Remedial Design (RD) work plan and response to comments (RTC). Also, U.S. EPA reviewed U.S. DOE's July 29, 1996, letter revising certain RD design deliverables.

The RTC adequately addressed U.S. EPA's previous comments and the responses have been incorporated into the revised RD work plan. U.S. DOE's revision to the design deliverable schedule, based on local citizen opposition and the need to relocate at least two aquifer optimization extraction wells is also acceptable.

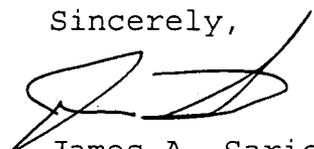

Therefore, U.S. EPA approves the RD work plan and the July 29, 1996, design deliverable revisions. U.S. DOE must submit a final RD work plan incorporating the revised design deliverable schedule within thirty (30) days receipt of this letter.
