RE: Building 4A Complex
Project Completion
Report

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) building 4A Complex project completion report.

Although the project completion report adequately summarizes decontamination and dismantlement activities for the building 4A Complex, several issues exist concerning waste material management and environmental monitoring.

Therefore, U.S. EPA disapproves the building 4A Complex project completion report pending incorporation of adequate responses to the attached comments. U.S. DOE must submit responses to comments and a revised document within thirty (30) day receipt of this letter.
