Announcement...

During January and February, the Fernald Community Reuse Organization (CRO) will participate in several working sessions to develop a strategic plan. The CRO will reconvene its regular monthly meetings on Tuesday, March 4. The focus of the March meeting will be a discussion of the draft strategic plan. More information on the March meeting, and the availability of the draft strategic plan for public comment, will be announced at a later date.

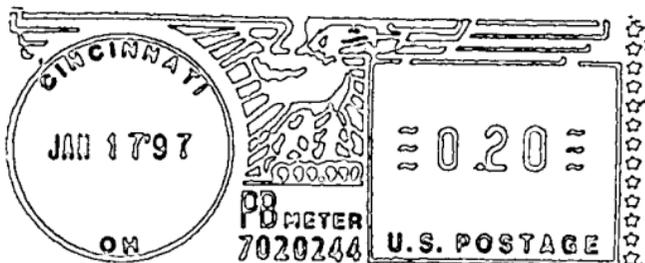

The CRO was formed to provide recommendations to the Department of Energy on social and economic development issues resulting from downsizing at the Fernald Environmental Management Project. For more information on the CRO, please call or write to:
