Mr. Paul Moskowitz
Division Head
Environmental & Waste Technology Center
Brookhaven National Laboratory
Upton, NY 11973

Dear Mr. Moskowitz:

PARTICIPATION IN FERNALD WORKSHOP

On the evening of June 16, 1997, the Fernald Environmental Management Project will be hosting a workshop to review options for treating materials from Fernald Silo 3. The Brookhaven National Laboratory (BNL)-developed technologies on microencapsulation and sulfur polymer treatment may have potential application at our site. For this reason, I request that you be available as a resource to support and potentially participate in this workshop. More specifically, I request that BNL establish contact with the workshop coordinator, Christine Langdon (803-725-5806), and be prepared to provide assistance possibly including samples, visual documentation, descriptive material on processing technologies, and oral overview of your technologies during the workshop or related breakout sessions.

Plans for the workshop are still under development, so we ask you to work with our coordinator to help firm up the program and provide any materials as needed. Although the workshop is planned for the evening of June 16, 1997, please plan to arrive at Fernald early enough that arrangements for participation can be reviewed.

Please confirm your participation to Paul Pettit, Fluor Daniel Fernald Technology Programs, at 513-648-4960. His office will also help with site access. We will send you an agenda, indicating times and location, when finalized. Your response by June 9, 1997, would be greatly appreciated. DOE-FEMP looks forward to BNL participation in our workshop.

Sincerely,

Rod D. Warner
Technical Program Manager
