77 West Jackson Boulevard
Chicago, Illinois 60604-3590**

Dear Mr. Murphy:

**REQUEST FOR APPROVAL TO RELOCATE NATIONAL EMISSION STANDARDS FOR
HAZARDOUS AIR POLLUTANTS AIR MONITORING STATION 24**

This letter serves to request written approval for relocating National Emission Standards for Hazardous Air Pollutants (NESHAP) Air Monitoring Station (AMS) 24 from its current location to approximately 330 feet east (see enclosed map). As discussed during your telephone conversation on January 5, 1997, with Kathleen Nickel of the Department of Energy (DOE) and Mark Cherry of Fluor Daniel Fernald (FDF), the property owners located directly across Willey Road from this monitor have expressed concern and annoyance at having the monitor in close proximity to their homes and have requested that it be relocated. Based on this request, the DOE has selected a proposed new location for AMS 24 within the same wind raised sector south of the facility for your consideration.

Once written approval has been received from your office, work will proceed to have this AMS relocated. Every effort will be made to minimize monitor downtime during the relocation process.

If you have any questions concerning this request, please contact Kathleen Nickel at (513) 648-3166.

Sincerely,

**Johnny W. Reising
Associate Director
Environmental Management**
