RE: IMPP Final Addenda No. 2, 3, and 4

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) final addenda No. 2, 3, and 4 to the Impacted Material Placement Plan (IMPP) for the On-Site Disposal Facility (OSDF).

The three addenda are specialized placement plans for materials not specifically covered in the IMPP. Addenda No. 2 describes two placement options for category 2, 4 and 5 thorium-impacted debris. Addenda No. 3 describes an alternative trenching method for placement of category 2 materials. Addenda No. 4 describes two options for placement of category 3 transite debris.

These addenda are based on earlier discussions between the Agencies and reflect the procedures proposed in various meeting. Therefore, U.S. EPA approves addenda No. 2, 3, and 4 to the IMPP for the OSDF.

Please contact me at (312) 886-0992 if you have any questions regarding this matter.

Sincerely,

James A. Saric
Remedial Project Manager
Federal Facilities Section
SFD Remedial Response Branch #2
