PROJECT TITLE: Re-Injection Demonstration Test Plan

Date: 02-15-00

VARIANCE / FIELD CHANGE NOTICE (Include justification):

Requirement

A monthly grab sample of the treated groundwater that is being used for re-injection will be collected and analyzed for the constituents listed in Table 2-1 of the test plan. According to procedure EW-0002 "Chain of Custody/Request for Analysis Record for Sample Control" the injectate samples should have been tracked in the FACTS and SED using the following project number 53100-PI-001.

2894

Variance:

The injectate water quality samples collected under this test plan will be tracked in the FACTS and SED using project number 50.03.77 "Re-Injection Demo (Injectate)".

Justification:

Several injectate water quality samples have already been incorrectly tracked to Project Number 50.03.77. An analysis of the situation indicates that it is more cost effective to draft a variance to the test plan to track the samples under Project Number 50.03.77 then it is to go back and revise all of the effected paperwork. Linking of these samples to Project Number 50.03.77 will only impact future data- base searches for the sampling results.
