Dear Fernald Stakeholder:

**1999 INTEGRATED SITE ENVIRONMENTAL REPORT**

Enclosed for your information and reference is the annual Fernald Environmental Management Project's 1999 Integrated Site Environmental Report. This report presents results from the environmental monitoring conducted during Calendar Year (CY) 1999, as well as a summary of the site's regulatory compliance activities during the year.

The 1999 Integrated Site Environmental Report was prepared by Fluor Fernald, Inc. for the Department of Energy, Fernald Environmental Management Project (DOE-FEMP). Both organizations have reviewed the report to ensure that valid and accurate environmental monitoring data are reported. This report is distributed to local, state, and federal agencies, Congress, the public, and the media. It includes a summary report and a single volume of supporting appendices.

The enclosed summary report provides the results from the site's environmental monitoring program for CY 1999 and a status of the DOE's progress toward final remediation of the Fernald site. This stand-alone report is intended to serve the same wide audience as past annual reports and will receive the same broad distribution to Fernald stakeholders. Detailed appendices are also available, and are intended to serve a more technical audience, such as the regulatory agencies, and will receive limited distribution. The summary report and appendices are available to all stakeholders through the Public Environmental Information Center located at 10995 Hamilton-Cleves Highway, Harrison, OH 45030, (513) 648-7480.

If you have any questions regarding this report, please contact Johnny Reising at (513) 648-3139 or Gary Stegner at (513) 648-3153.

Sincerely,

for Jack R. Craig  
Director
