Subject: Approval of the Task Order #464 Completion Report

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has reviewed the above-referenced document prepared by the U.S. Department of Energy (U.S. DOE) which is dated December 2000. The document summarizes the results of activities completed under Task Order No. 464, which included decontamination and dismantlement (D&D) of:

- Component 2E - Nuclear Fuel Storage Tanks;
- Component 28A - Security Building;
- Component 28B - Industrial Relations Building; and
- Component 28N - Main Gate Guard Post.

U.S. EPA's review of the document focused on assessing the adequacy of documentation of D&D activities and the lessons learned from the D&D activities. The documentation and lessons learned discussions are adequate, therefore U.S. EPA approves the document. Please contact me at (312) 886-4591 if you have any questions.

Sincerely,

Gene Jablonowski
Project Manager
Federal Facilities Section
Superfund Division
