

VARIANCE / FIELD CHANGE NOTICE

V/F No. 3

WBS NO.: 2505-WP-0022

**51350**

Page 1 of 1

PROJECT TITLE: Integrated Environmental Monitoring Plan, Rev. 2.

Date: 11-29-01

VARIANCE / FIELD CHANGE NOTICE (Include justification):

Requirement:

**4038**

Section 3.5.1.2 South Field Extraction Module. Monitor 25 groundwater monitoring wells quarterly.

Variance: Add CMT Monitoring Well 82433 to the list of wells to be sampled quarterly. Sample CMT Monitoring Well 82433 at all depth (EXCEPT C-7) intervals for two quarters, but only analyze the samples for uranium. Then continue to sample the well quarterly at a single selected depth and analyze the collected sample for uranium only. The single selected depth will be based on results of the first two sampling events. The depth with the highest uranium concentration will be selected. Once a year, collect samples from all depths and analyze the samples for uranium only.

*KAB*  
*12/11/01*

Justification: This well was recently installed in the South Field. It provides full vertical monitoring coverage of the uranium plume. Data collected from this well will be useful to assess aquifer restoration progress and to aid in making operational decisions concerning extraction wells in the area.
