Dear Fernald Stakeholder:

**2001 SITE ENVIRONMENTAL REPORT**

Enclosed for your information and reference is the Fernald Environmental Management Project's 2001 Site Environmental Report (formerly referred to as the Integrated Site Environmental Report in past years). This report presents results from the environmental monitoring conducted during calendar year 2001, as well as a summary of progress toward final remediation and regulatory compliance activities at the Fernald site during the year.

Fluor Fernald, Inc., on behalf of the United States Department of Energy, prepared the 2001 Site Environmental Report. Both organizations have reviewed the report to ensure that valid and accurate environmental monitoring data are reported. This report is distributed to local, state, and federal agencies and politicians, the public, and the media. It includes a summary report and a single volume of supporting appendices.

This stand-alone summary report is intended to serve the same wide audience as past annual reports and will receive the same broad distribution to Fernald stakeholders. Detailed appendices are also available, and are intended to serve a more technical audience, such as the regulatory agencies, and will receive limited distribution. The summary report and appendices are available to all stakeholders through the Public Environmental Information Center located at 10995 Hamilton-Cleves Highway, Harrison, OH 45030, (513) 648-7480.

If you have any questions regarding this report, please contact Johnny Reising at (513) 648-3139 or Gary Stegner at (513) 648-3153.

Sincerely,

  
Stephen H. McCracken  
Director
