This letter transmits the Final version of the Comprehensive Legacy Management and Institutional Controls Plan (LMICP). The LMICP will be used by the Department of Energy (DOE) Office of Legacy Management to manage site activities after physical completion of the Fernald site cleanup. The Office of Legacy Management has been

working closely with the DOE Office of Environmental Management and Fluor Fernald, Inc., to develop the LMICP. The Office of Legacy Management is currently scheduled to take over management of the site in July 2006.

All support plans that are included with the LMICP have been updated and are included in this Final version. This transmittal also includes responses to the U.S. Environmental Protection Agency (EPA) and Ohio EPA comments. Ohio EPA comments were received on the support plans issued with the April version of the LMICP. U.S. EPA comments were received on the September version and the responses are provided.

The LMICP has been revised to propose annual reviews and to revisions as necessary. As written, any outstanding issues after submittal of this version of the LMICP would be addressed in the January 2007 revision.

If you have any questions regarding this matter, please contact Eric Woods at 513-478-1547.

Sincerely,

A handwritten signature in cursive script that reads "Dennis Sizemore". The signature is written in black ink and is positioned above the printed name and title.
