RE: Concrete Structures in Silos 1 and 2  
Area Certification Report

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) final certification report for selected concrete structures in the Silos 1 and 2 area. The document provides certification information and data to demonstrate the specific concrete structures in the area meet final remediation levels and can be used for beneficial reuse.

The certification report adequately demonstrates that the area has achieved the final remediation levels, and is consistent with other certification reports. Therefore, U.S. EPA approves the final certification report for selected concrete structures in the Silos 1 and 2 area.

Please contact me at (312) 886-0992 if you have any questions regarding this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Saric".
