RE: Radon Control System and Silo 3
Concrete Structures CDL and
Certification PSP

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) Certification Design Letter (CDL) and certification Project Specific Plan (PSP) for the radon control system and Silo 3 concrete structures. The document describes data collection activities necessary to demonstrate that the concrete slabs and walls in the radon control system and Silo 3 project area meet the soil final remediation levels and can be used for beneficial reuse.

The document is technically adequate however, there are three minor inconsistencies that must be addressed. U.S. EPA has enclosed comments on the document. Therefore, U.S. EPA approves the CDL and certification PSP for the radon control system and Silo 3 concrete structures.

Please contact me at (312) 886-0992 if you have any questions regarding this matter.

Sincerely,

James A. Saric
Remedial Project Manager
