

Variance Report

Variance No.: LMS-FER-S03496-7.0-03 **Significant:** Yes No
Document No.: S03496-7.0 **Page:** 1 of 1
Document Title: Comprehensive Legacy Management and Institutional Controls Plan (LMICP), Rev. 7.0 **Date:** 5/28/2014

Variance
(Include Justification)

Requirements: Section 2.1, Table 2 (Pages 7 and 8), footnote "f" of Appendix B (Project-Specific Plan for the On-Site Disposal Facility Monitoring Program) of the Groundwater Leak Detection and Leachate Monitoring Plan, (GWLMP) (LMICP, Attachment C) states; "Cadmium is monitored at Cell 8 only."

Variance: The text for footnote "f" will be changed to "Cadmium is monitored at the Cell 8 LDS only."

Justification: The "Fernald Preserve 2012 Site Environmental Report" (May 2013), indicated that cadmium is analyzed in the Cell 8 Leak Detection System (LDS) on a quarterly basis. It did not include analysis for cadmium in the other horizons, except for the annual analysis where it is monitored in all Leachate Collection Systems. That cadmium only needs to be monitored in the Cell 8 LDS can be verified by a review of the 2012 SER Attachment A.5, Sub-attachment A.5.8, Section A.5.8.5, page 5.
