ON-SITE DISPOSAL FACILITY DESIGN WORKSHOP

June 4, 1996

Thank you for attending this workshop to inform our stakeholders on the status of the design of the on-site disposal facility. Please take a few moments to answer the questions below so that we can use this information in planning future involvement opportunities.

1. Did the presentation(s) include an appropriate level of detail?

NO

Were they too long or too short?

TOO LONG, THE DISCUSSION DEGENERATED INTO A DEBATE ABOUT WASTE ACCEPTANCE CRITERIA INSTEAD OF GIVING IMPORTANT DETAILS, SUCH AS CONSTRUCTION PRACTICES.

2. Was the "demonstration" part of the workshop helpful in showing what materials the on-site disposal facility will be made of and how construction will be performed?

YES. THE SAMPLE MATERIALS WERE HELPFUL TO SHOW DETAILS OF CONSTRUCTION.

3. Did you find the video "Geosynthetics in Landfills" to be helpful?

YES

Were the subject matter and level of detail appropriate?

YES

4. Were your questions or concerns appropriately handled throughout the workshop?

YES

5. How did you find out about tonight's meeting (postcard, newspaper ad, FRESH or Task Force meeting, etc.)?

POSTCARD

6. Do you have any other constructive comments or criticism about tonight's workshop?

IF CITIZEN'S GROUPS WANT TO QUESTION DETAILS OF WASTE ACCEPTANCE CRITERIA, A SEPARATE MEETING SHOULD BE SCHEDULED. THIS CONFLICT INTERFERED WITH THE INFORMATIONAL PURPOSE OF THIS WORKSHOP.

ON-SITE DISPOSAL FACILITY DESIGN WORKSHOP

June 4, 1996

Thank you for attending this workshop to inform our stakeholders on the status of the design of the on-site disposal facility. Please take a few moments to answer the questions below so that we can use this information in planning future involvement opportunities.

1. Did the presentation(s) include an appropriate level of detail?

Yes

Were they too long or too short?

We made it too long but questions are important

Sorry this is so messy in main not in gear!

2. Was the "demonstration" part of the workshop helpful in showing what materials the on-site disposal facility will be made of and how construction will be performed?

Thanks for bringing the samples of welded lining.

3. Did you find the video "Geosynthetics in Landfills" to be helpful?

Makes it a bit more understandable

Were the subject matter and level of detail appropriate?

We have lots of questions as of now

4. Were your questions or concerns appropriately handled throughout the workshop?

We still have to go through our own understanding mode!

5. How did you find out about tonight's meeting (postcard, newspaper ad, FRESH or Task Force meeting, etc.)?

Fresh-Postcard

6. Do you have any other constructive comments or criticism about tonight's workshop?

I guess my mind is working on Lisa's comments about big things in cell! Over the many years these big things will perhaps fall apart leaving us with falling debris and perhaps

June 4, 1996

Thank you for attending this workshop to inform our stakeholders on the status of the design of the on-site disposal facility. Please take a few moments to answer the questions below so that we can use this information in planning future involvement opportunities.

1. Did the presentation(s) include an appropriate level of detail?

Were they too long or too short?

yes
Mike ~~he~~ was not informative, I think Nancy knew more than he did!

2. Was the "demonstration" part of the workshop helpful in showing what materials the on-site disposal facility will be made of and how construction will be performed?

3. Did you find the video "Geosynthetics in Landfills" to be helpful?

Very interesting

Were the subject matter and level of detail appropriate?

4. Were your questions or concerns appropriately handled throughout the workshop?

Partly

5. How did you find out about tonight's meeting (postcard, newspaper ad, FRESH or Task Force meeting, etc.)?

Postcard, Fresh & newspaper ad.

6. Do you have any other constructive comments or criticism about tonight's workshop?

Why was no women on the Agenda tonight? Your slipping again

We don't need the fancy white tablecloths on the tables, they are easier to write on the bare table & saves money & time to have to wash them after every use. Save money. they don't need

Fancy things.

ON-SITE DISPOSAL FACILITY DESIGN WORKSHOP

June 4, 1996

Thank you for attending this workshop to inform our stakeholders on the status of the design of the on-site disposal facility. Please take a few moments to answer the questions below so that we can use this information in planning future involvement opportunities.

1. Did the presentation(s) include an appropriate level of detail? *yes*

Were they too long or too short? *Just right*

2. Was the "demonstration" part of the workshop helpful in showing what materials the on-site disposal facility will be made of and how construction will be performed? *yes*

3. Did you find the video "Geosynthetics in Landfills" to be helpful? *yes*

Were the subject matter and level of detail appropriate? *yes*

4. Were your questions or concerns appropriately handled throughout the workshop? *yes*

5. How did you find out about tonight's meeting (postcard, newspaper ad, FRESH or Task Force meeting, etc.)?

6. Do you have any other constructive comments or criticism about tonight's workshop?

*Need a workshop on Concern of Category 5
(Special Handling)*

Thank you for attending this workshop to inform our stakeholders on the status of the design of the on-site disposal facility. Please take a few moments to answer the questions below so that we can use this information in planning future involvement opportunities.

1. Did the presentation(s) include an appropriate level of detail?

yes!

Were they too long or too short? fine

2. Was the "demonstration" part of the workshop helpful in showing what materials the on-site disposal facility will be made of and how construction will be performed?

yes, good to see actual materials that will be used.

3. Did you find the video "Geosynthetics in Landfills" to be helpful?

yes

Were the subject matter and level of detail appropriate?

yes

4. Were your questions or concerns appropriately handled throughout the workshop?

yes!

5. How did you find out about tonight's meeting (postcard, newspaper ad, FRESH or Task Force meeting, etc.)?

6. Do you have any other constructive comments or criticism about tonight's workshop?

good - open discussion

lots of follow-up workshops, meetings, etc.
