

**FERNALD SILOS PROJECT WORKSHOP  
ACCELERATED WASTE RETRIEVAL REQUEST FOR PROPOSAL  
APRIL 1, 1998**

**Evaluation Survey**

*Thank you for attending tonight's workshop to discuss issues pertaining to Fernald's Accelerated Waste Retrieval Project. Please take a few minutes to answer the questions below:*

1. How did you hear about this public workshop?

- Received a postcard in the mail  
 A Look Ahead publication  
 Fernald Report  
 Announcement at March Cleanup Progress Briefing  
 Other (please indicate) *FRESH CORP. GROUP*

2. After tonight's meeting, do you have a better understanding of the Accelerated Waste Retrieval Project?

*Somewhat!*

3. What, if any questions or concerns do you have about the Accelerated Waste Retrieval Project?

*Am all the time worry about Safety*

4. Did you review the available sections of the *Silos 1 and 2 Accelerated Waste Retrieval Request for Proposal* prior to tonight's meeting (Statement of Work, Evaluation Criteria, and Technical Requirements Matrix)?

Yes  *Some* No

5. What, if any, questions or concerns do you have about this information?

*Good or Bad keep us informed*

6. Do you have any feedback about the presentation provided at tonight's meeting?

7. Please indicate additional feedback you have about tonight's meeting.

Optional:

FERNALD SILOS PROJECT WORKSHOP  
ACCELERATED WASTE RETRIEVAL REQUEST FOR PROPOSAL  
APRIL 1, 1998

Evaluation Survey

Thank you for attending tonight's workshop to discuss issues pertaining to Fernald's Accelerated Waste Retrieval Project. Please take a few minutes to answer the questions below:

1. How did you hear about this public workshop?

- Received a postcard in the mail
- A Look Ahead publication
- Fernald Report
- Announcement at March Cleanup Progress Briefing
- Other (please indicate)

2. After tonight's meeting, do you have a better understanding of the Accelerated Waste Retrieval Project?

YES

3. What, if any questions or concerns do you have about the Accelerated Waste Retrieval Project?

SEE 5 below

4. Did you review the available sections of the Silos 1 and 2 Accelerated Waste Retrieval Request for Proposal prior to tonight's meeting (Statement of Work, Evaluation Criteria, and Technical Requirements Matrix)?

Yes

No

5. What, if any, questions or concerns do you have about this information?  
Do you have any feedback about the presentation provided at tonight's meeting?

*I believe that we were told that all workers involved would be instructed to stop work should safety concerns appear. If I am mistaken, they should be. We should discover safety or system failures as they develop so they can be corrected.*

MORE THAN ADEQUATE

7. Please indicate additional feedback you have about tonight's meeting.

Evaluation Survey

Thank you for attending tonight's workshop to discuss issues pertaining to Fernald's Accelerated Waste Retrieval Project. Please take a few minutes to answer the questions below:

1. How did you hear about this public workshop?

- Received a postcard in the mail
- A Look Ahead publication
- Fernald Report
- Announcement at March Cleanup Progress Briefing
- Other (please indicate)

2. After tonight's meeting, do you have a better understanding of the Accelerated Waste Retrieval Project? *yes, in some areas.*

3. What, if any questions or concerns do you have about the Accelerated Waste Retrieval Project? *I feel it is very frivolous - almost criminal - to spend vast amounts of money to move the residues to another set of tanks when final treatment has not even been decided. The chances for accidents are going to be orders of magnitude higher than the "do nothing" option.*

4. Did you review the available sections of the Silos 1 and 2 Accelerated Waste Retrieval Request for Proposal prior to tonight's meeting (Statement of Work, Evaluation Criteria, and Technical Requirements Matrix)?

Yes \_\_\_\_\_ No  *they were not sent to me.*

5. What, if any, questions or concerns do you have about this information?  
*see #3*

6. Do you have any feedback about the presentation provided at tonight's meeting?  
*presenters seemed to try to do their best*

7. Please indicate additional feedback you have about tonight's meeting.

#3 (cont) Recent experience has shown that accidents and spills/releases are very probable when you start "messing around" with this stuff. Radon will be essentially "free released" the whole time the Silos are open until all the residues are transferred and the "hatches" are closed. "Headspace radon control" does not sound like it will be effective. Have any radon experts been consulted on this? Radon is very, very difficult to control.

This sounds like a "make work" project for engineers who are waiting for "final treatment" projects to begin. These Silos have been in place for 45 years. They are in essentially the same physical condition they were in 12 years ago.

There is no compelling reason for this project.

There is no compelling reason for this project. (twice)

The "possibility of tornado" is a tired old pony that has been trotted out every time they want to do something (supposedly) "smart" to the Silos - like dumping sand or bentonite into them.

Both of those were very bad ideas.

This one is even worse. For "2 or 3 years AT THE MOST" (quote from Lisa Crawford), it makes no sense at all to take these risks. Even for a 10-yr storage time, my opinion is that it is much, much better to just leave the residues alone (with good radon treatment of the headspace) until the final treatment technology is selected and ready to go.
