SUBJECT: Groundwater Characterization Field Activities for 1995-1996, LEHR

Dear Duncan, Hedy, and Susan:

Enclosed please find your copy of the LEHR Groundwater Characterization Field Activities Report. This report summarizes DOE funded work to further characterize the hydrogeology and groundwater chemistry beneath the LEHR site, with the primary focus on groundwater.

Activities undertaken in 1995 and 1996 which are documented in the enclosed report include well installation, geophysical logging, well development, groundwater sampling, slug testing, Westbay groundwater monitoring system installation, continuous water level monitoring, and hydropunch sampling at 61 on-site and off-site locations. Most of the results contained in the report have been presented, in one form or another, to at our regular RPMs meetings. I hope you find this report beneficial.

If you have any questions and/or comments, please call me at (510) 637-1526.

Sincerely,

Jim Littlejohn
DOE Project Manager
