955 Mound Road
Miamisburg, OH 45342

SUBJECT: Contract No. DE-AC01-02GJ79491
Deliverable - Mound Site Community Involvement Plan (CIP) January 2008

Dear Mr. Kleinrath:

Attached are 20 copies of the updated Mound Site Community Involvement Plan, January 2008, to be distributed to the Regulators and stakeholders. This update includes a few minor wording changes and the latest contact information.

Copies will be available in the Reading Room and electronically on the LM Mound website.

Please contact Joyce Massie at 937-847-8350, extension 312 if you have any questions.

Sincerely,

Henry d. Weidenbach for Glenn Griffiths

720 Mound Road, Suite 480
Miamisburg, OH 45342

Attention: Mr. John Weithofer

Subject: Mound Community Involvement Plan (CIP)

Dear Mr. Weithofer:

Attached are six copies of the updated CIP, which outlines the Department of Energy (DOE) Legacy Management's public involvement after site closure.

Additional copies are available in the Public Reading Room. We will also email the pdf file to you.

DOE Legacy Management reviews this Plan annually and updates it as required. If you have any questions regarding the Plan, please contact me at 937-847-8350 extension 318 or Joyce Massie at extension 312.

Sincerely,

Arthur W. Kleinrath

1.0 Introduction

This Mound Community Involvement Plan documents how the U.S. Department of Energy (DOE) will ensure public involvement in post-closure activities at the Mound Site in Miamisburg, Ohio. The community relations activities follow U.S. Environmental Protection Agency (EPA) and DOE guidance on public participation and comply with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) public participation requirements, as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA). Additional basis documents include the *DOE-Mound's Land Transfer Process* (DOE 1999a) and the *Work Plan for Environmental Restoration of the DOE Mound Site, the Mound 2000 Approach* (DOE 1999b) documents.

The Mound Site is managed by DOE Office of Legacy Management (LM). LM's mission is to effectively and efficiently manage the environmental and human legacy issues related to the U.S. Government's Cold War nuclear weapons program for current and future generations.

This plan, which provides LM's plans for public involvement and methods of communication after site closure, will be updated as required. Appendix A, "Mound Site Contact List," will be reviewed at least annually and updated as required.

2.0 Site Description and Background

The Mound Site, formerly known as the Mound Plant, takes its name from a nearby Native American burial mound. The facility is sited on a hill in the center of Miamisburg, Ohio, and is built on approximately 306 acres. Construction of the Mound Plant began in 1946, and the site became operational in 1948. Mound was the nation's first post-war Atomic Energy Commission site to be constructed and was established to consolidate and continue the polonium-related work being done at the Dayton Units.

Much of the work at the Mound Plant during the Cold War involved production of the polonium-beryllium initiators used in early atomic weapons and the manufacture of and research related to radionuclides. In the 1950s, the facility began to manufacture a variety of nuclear weapons parts, including cable assemblies, explosive detonators, and the electronic firing sets that activated them. Work evolved and grew to include stable isotope separation, fossil fuels research, tritium recovery for reuse in weapons, developing radioisotopic thermoelectric generators used for providing electrical power for space exploration and other non-nuclear research and development activities. The non-weapons polonium work ended in 1972, and the Mound Plant stopped producing weapons components in 1995.

In 1993, DOE decided to decommission and clean up the Mound Site in accordance with CERCLA. Miamisburg formed the Miamisburg Mound Community Improvement Corporation (MMCIC) to transition the Mound Site for reuse as a technology and industrial park known as the Mound Advanced Technology Center (MATC). DOE has supported the economic development effort with grants totaling approximately \$50 million.

The DOE Office of Environmental Management (EM) followed all regulatory requirements and remediated the site to meet standards for reuse as an industrial use only site. Only 16 buildings remain of over 120 original structures.

3.0 Regulatory Framework

In response to growing concern about health and environmental risks posed by hazardous waste sites, Congress established the Superfund Program in 1980 and SARA in 1986 to clean up these sites. EPA administers the Superfund Program in cooperation with individual states and tribal governments. The National Priorities List (NPL) is a list of top-priority hazardous waste sites that are eligible for extensive, long-term cleanup under the Federal Superfund Program. EPA placed the Mound Site on the NPL in November 1989 because of chemical contamination in the site groundwater and the site's proximity to a sole source aquifer. All sites under the Superfund Program are regulated by CERCLA, as amended by SARA, and Subpart E of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), found in Title 40 *Code of Federal Regulations* Part 300.400.

All cleanup activities must satisfy the requirements of CERCLA. In 1995 following the first Record of Decision (ROD) for Operable Unit 1, DOE and its regulators found the traditional CERCLA process to be inefficient because of variations in the site contamination conditions. Therefore, they developed the alternative approach, the Mound 2000 Process, to make decisions about the environmental restoration of the remainder of the Mound Site. DOE and its regulators use the Mound 2000 Process to address the environmental issues associated with the cleanup and the termination of DOE's remediation activities at the site. This approach satisfies the intent of CERCLA and is further defined in two documents: the *DOE-Mound's Land Transfer Process* (DOE 1999a) and the *Work Plan for Environmental Restoration of the DOE Mound Site, the Mound 2000 Approach* (DOE 1999b).

Under the Mound 2000 Process, DOE and the regulators evaluate each Potential Release Site (PRS) or building separately and use removal action authority to remediate each location as required. A PRS is an area where knowledge of historic or current use indicates that the site may have had releases of radioactive and/or hazardous materials. After completing all necessary removal actions for a specific area or parcel, DOE performs a Residual Risk Evaluation. DOE then issues a ROD for that parcel that allows the site to be de-listed from the NPL. The ROD specifies institutional or engineering controls, such as deed restrictions, to be applied to the parcel. Following completion of the parcel ROD, DOE prepares an Environmental Summary, which documents that DOE has met the requirements of CERCLA 120(h) for the parcel. This summary provides a brief description of the historical uses, PRS, and residual risk; includes a building data package of environmental findings and actions taken; and provides an explanation of other factors considered (e.g., cultural resources or floodplains). The summary also supports a transfer of deed to new ownership for economic development. Although the process is different from a traditional Remedial Investigation/Feasibility Study under CERCLA, it is consistent with CERCLA and the NCP.

In 1998, DOE established a sales contract with MMCIC that allows for conveyance of the Mound property by discrete parcels, subject to the CERCLA 120(h) process. After a ROD and Environmental Summary have been approved for a particular parcel and approval given from

EPA, DOE can transfer the property to the MMCIC via a quitclaim deed. The quitclaim deed also contains or refers to institutional controls (land use restrictions) in the form of deed restrictions as required under CERCLA to ensure that the parcel is protective of human health and the environment. To date, four parcels (i.e., Parcels D, H, 3, and 4) have been transferred from DOE to MMCIC (Figure 1). Parcel I (A, B, and C) has completed the Mound 2000 process, but has not transferred to MMCIC.

4.0 Community Profile

Miamisburg is located in southwestern Ohio, approximately 10 miles southwest of Dayton, in Montgomery County. The 2000 census figures indicate that there are 340,000 residents within a 10-mile radius of the Mound Site. Figure 2 shows a location map of Mound and relative location to Miamisburg. The name Miamisburg was derived from the Miami Indian tribe that resided there, combining “Miamis” with “burg,” which denotes a borough or town. The Great Miami River flows from northeast to southwest through Miamisburg and dominates the geography of the region surrounding the Mound Site. The river valley is highly industrialized, while the rest of the region is a mix of farmland, residential areas, small communities, and light industry. Key interstates and highways—I-75, I-70, and the I-675 corridor—connect near Miamisburg. Universities and other research parks are close by, as are the Wright Patterson Air Force Base and Dayton International Airport. Major markets, such as Columbus and Cincinnati, are approximately 1 hour by car.

5.0 Interested Community Members, Local, City, and State Elected Officials

Many stakeholders and organizations have played an integral role in activities and decisions related to Mound. The primary local organizations representing stakeholders are listed below. Contact information is located in Appendix A.

The MMCIC is a not-for-profit, community reuse organization responsible for economic, commercial, and industrial development activities and the management of transitioned assets at Mound. MMCIC is overseeing the conversion of Mound to a viable industrial park. As such, the MMCIC has been designated as an agent of the City of Miamisburg for Mound. Although not employed by the city, MMCIC works closely with the City Council.

The Mound Reuse Committee (MRC) was chartered by the City of Miamisburg and its members include City Council members, Ohio EPA, Mound Environmental Safety and Health (MESH), MMCIC, and county employees. DOE and Stoller Corporation (DOE contractor) representatives generally attend the meetings. The committee convenes monthly and the public is invited to attend.

Figure 1. Site Map with Parcel Boundaries

Figure 2. Location of Mound Site

The **MESH** is a non-profit citizen organization concerned with the health and well being of the surrounding community and its future generations. The organization is primarily devoted to environmental protection, safety, and public health issues. They believe in the importance of community involvement in environmental decision making.

The **Mound Museum Association (MMA)** works to preserve the history of the former Mound Plant and to become a local resource for any future inquiries about the site. The historical items in the association's possession include various technical publications, photographs, and other Cold War-related artifacts that were invented or developed by Mound scientists.

Other stakeholders for the Mound Site include:

- Federal agencies, including EPA.
- State governmental agencies, including Ohio EPA and Ohio Department of Health.
- Elected State of Ohio officials.
- Citizens of the City of Miamisburg and Montgomery County.
- Congressional delegations.
- Tenants of the MATC.
- Residents in neighborhoods adjacent to the site.
- Local elementary and secondary schools.
- Environmental organizations.
- Local media.
- Business owners.
- Service organizations.
- Other interested individuals.

6.0 Roles and Responsibilities

LM is responsible for the long-term care of legacy liabilities of former nuclear weapons production sites following completion of the EM cleanup. LM's goals are to:

- Protect human health and the environment through effective and efficient long-term surveillance and maintenance.
- Preserve, protect, and make accessible legacy records and information.
- Support an effective and efficient work force structured to accomplish Departmental missions and assure contractor worker pension and medical benefits.
- Manage legacy land assets, emphasizing protective real and personal property reuse and disposition.
- Improve program effectiveness through sound management.

LM will monitor the Mound Site for compliance with the requirements outlined in the Mound Long-Term Surveillance and Maintenance Plan (LTS&M Plan) (DOE 2005). These include:

- All activities necessary to operate and maintain selected remedies that are in effect to protect human health and the environment.
- All engineered and institutional controls designed to contain or to prevent exposure to residual contamination and waste, such as surveillance activities, record-keeping activities, inspections to evaluate the condition of surface features, and groundwater monitoring.

7.0 Public Participation Activities

LM conducts public participation activities to provide timely information to the public and encourage ongoing, two-way communication between DOE and the public about the Mound Site. Contact information for the LM Mound Site is given in Appendix A.

The following are general descriptions of post-closure public participation activities at the site. As DOE activities at the site diminish, there will be a corresponding reduction in topics that warrant communication.

8.0 Meetings

LM provides briefings, workshops, and presentations on site activities in a variety of public forums.

8.1 Public Meetings

LM will hold public meetings annually or as circumstances dictate to address post-closure issues of importance to stakeholders. LM will work with stakeholders to address concerns relating to post-closure operation and maintenance issues. LM will schedule meetings in conjunction with other Mound meetings such as the MRC, MMA, or City Council meetings.

8.2 Briefings for Local, State, and Federal Elected Officials

LM will hold briefings with elected officials as needed to discuss new data trends or the evaluation of post-ROD changes.

8.3 Meetings with Citizens Groups

LM will work with stakeholder entities to address community concerns or issues that arise after the surveillance and maintenance responsibility transfers to LM. The anticipated longevity of existing citizens groups associated with Mound is currently undetermined.

9.0 Administrative Record and Public Reading Room

DOE established a Public Reading Room, which contains documents and information related to Mound as required under Section 117(d) of SARA. Copies of key Mound records, including the CERCLA Administrative Record and Information Repository, are kept in the Public Reading Room. The Administrative Record and Information Repository for Mound are updated as new documents are created, and an index of documents in the complete collections accompanies each update.

The Public Reading Room also contains reference items consisting of technical documents, news clippings, videotapes, journal articles, annual reports, and environmental restoration and decontamination and decommissioning decisional documents. Stakeholders are notified through public notices when a document is available for public comment and review copies are placed in the reading room.

The reading room address and hours of operation are:

Mound View Legacy Building
955 Mound Road
Miamisburg, OH 45342
Hours: Monday–Thursday 8 a.m.–5 p.m.
Closed Friday, Saturday, Sunday, Holidays

LM will maintain a web page for the Mound Site:
<http://www.lm.doe.gov/land/sites/oh/mound/mound.htm>

The website provides a link to electronic copies of the CERCLA Administrative Record, post-closure documents, annual reports, and other key documents associated with the cleanup and remedy.

The website provides a link to the Geospatial Environmental Mapping System that provides site environmental sampling information.

10.0 Site Tours

LM may conduct or participate in site tours to meet public informational needs or as requested by MMCIC. Tours will be coordinated between MMCIC and LM.

For information on tours of MMCIC-owned property at the MATC, contact the MMCIC individual listed in Appendix A.

11.0 Documents for Public Review and Comment

As required by CERCLA regulations, LM will provide opportunities for stakeholders to review and comment on post-closure documents, including 5-year reviews. For documents not specified

by statutes and regulations, LM will use the consultative process with stakeholders to address citizen expectations for involvement in public review and comment. DOE anticipates the number of documents developed postclosure to be minimal.

The Mound Site LTS&M Plan (DOE 2005) explains how LM will fulfill its surveillance and maintenance obligation at the site. The LTS&M Plan may be accessed at the Mound LM website <http://www.lm.doe.gov/land/sites/oh/mound/mound.htm> or in the Reading Room.

11.1 News Releases and Editorials

LM will issue news releases and/or community advisories to announce public meetings regarding LM documents or significant post-closure activities. MMCIC and DOE will provide each other with advance copies of any news releases or community advisories.

11.2 Neighborhood and Tenant Notices

LM will place announcements in local newspapers as prescribed by CERCLA.

11.3 Fact Sheets

LM will prepare fact sheets as needed to describe LM post-closure activities. These fact sheets will be available to stakeholders and posted on the LM website.

12.0 Public Outreach Presentations

LM is evaluating the need for a local staff person(s) to remain at the site postclosure. This on-site staff person, or an off-site LM representative, would give presentations on Mound as requested.

13.0 Emergency Contacts

LM has established mechanisms with local emergency responders to respond to any environmental emergency that may occur at the site postclosure. LM will make prompt notifications to established points of contact, regulators, and other affected parties if such a situation arises. The LTS&M Plan for the site provides additional details on response actions and contingency planning.

14.0 Mailing Lists

LM maintains a contacts database of all stakeholders associated with any LM site and maintains a site-specific Mound stakeholders' list.
