**RE: RLCR for the Building 371 Cluster at Rocky Flats Environmental Technology Site
(RFETS)**

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the "Division") received the *Reconnaissance Level Characterization Report (RLCR) for the Building 371 Cluster (Revision 0, dated August 28, 2000)* on November 13, 2000. In accordance with Section 3.3.4 of the *Decommissioning Program Plan*, the Division hereby concurs with the determination that Building 371 is a Type 3 facility. However, since Building 374 is a major support building and is interconnected with Building 371, the Division does not concur with the Type 2 determination for Building 374. Decommissioning work in Building 374 must be planned and conducted under an approved Decommissioning Operations Plan (DOP) for both Buildings 371 and 374. Because supporting data for the other facilities described in the RLCR was not submitted with the RLCR, the Division will need additional time to review this data and determine whether or not to concur with their respective type characterizations. The Division plans to complete the concurrence determination for the other facilities in the Building 371 cluster by December 22, 2000. If you have any questions regarding this matter please contact James Hindman at (303) 692-3345.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
