

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: April 18, 2005 / 4:00 pm

Site Contact(s): Randy Leitner
Phone: x3537

Regulatory Contact: David Kruchek
Phone: 6728/(303)692-3328

Agency: CDPHE

Purpose of Contact: Propose external wall opening on B371 north basement for backfill

Discussion

Mr. Kruchek was contacted to inform him of the Project's plans to create an external wall opening (approximately 2' x 2') on the north side of Building 371 to facilitate sub-basement back-filling operations. The proposed opening will be made below the main floor, at the upper east portion of the north wall of Room 2319. The east portion of Room 2319 is open to the sub-basement Room 1105, thus creating a direct pathway for fill material to enter an area of the sub-basement not accessible from the current eastside opening.

The portion of the basement wall where the breach is to be made was fully characterized as part of the sub-basement characterization effort (reference DOP Activity Measurements – Survey Areas E, F and G). All surfaces have been confirmed to be less than 20 dpm removable for plutonium, and have a maximum of 5,000 to 10,000 dpm fixed. This portion of the wall has been characterized in accordance with the Pre-Demolition Survey Plan. This area was never considered a beryllium area and therefore did not require any further characterization. However, all recent routine historical Be sampling in this area never detected any Be. The area where the breach will be made has been isolated from the remainder of room 2319 by a plastic wall, which extends from the floor to the ceiling. Radiological controls will be implemented in accordance with the applicable work package(s) to ensure no contamination is released during the breach and backfilling activities.

Mr. Kruchek concurred with the proposal.
