

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: 11/24/04 – 0640 & 1047

Site Contact(s): K.W. Shuler (RFCSS) – (KWS-001)
Phone: (303) 966-3423

Regulatory Contact: David Kruchek, CDPHE
Phone: (303) 692-3328

Agency: CDPHE

Purpose of Contact: Building 451, Pad Removal

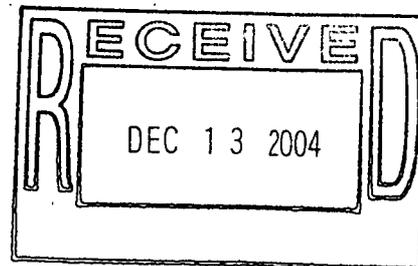

Meeting Attendance: K. Shuler, RFCSS David Kruchek, CDPHE

Discussion

On October 6, 2004, the State approved the Pre-Demolition Survey Report (PDSR) for the Building 451 (B451) metal filter plenum structure (Steven H. Gunderson (CDPHE) letter to Joe Legare (DOE)). The approval did not include the concrete pad/slab under the metal plenum:

Since the concrete pad is also considered part of B451, it must also be properly investigated/characterized once the plenum structure is removed. The ultimate disposition of this concrete pad will depend upon the results of the investigation performed. As such, the investigation to be performed and the results obtained must be discussed with us utilizing the consultative process prior to demolition or agreement on the final disposition of the B451 concrete pad.

On November 13, 2004, demolition commenced on the B451 metal filter plenum structure. On November 16, 2004, a radiological survey was conducted. On November 19, 2004, a beryllium survey was conducted. The survey results for both were below the Site's free release limits. On November 24, 2004, those survey results were provided to and reviewed with the State (Kruchek). Following the review, the State concurred that, based on the data provided, the B451 pad meets the unrestricted release criteria and can be demolished and removed.
