TRANSMITTAL OF THE B560 RECONNAISSANCE LEVEL CHARACTERIZATION REPORT (RLCR) – DWF-014-01

Provided for your review and approval is the enclosed subject report for the B560 cooling tower. This report characterizes the physical, chemical and radiological hazards associated with this facility, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization, and presents the data quality assessment, verification and validation of results.

Results of our characterization effort indicate that no radiological or chemical hazards exist in excess of the PDSP guideline values and no significant physical hazards are present. Some asbestos-containing thermal system insulation is present and will be removed prior to facility demolition in compliance with the applicable regulations and Site procedures. Painted debris will be managed as PCB bulk product waste. Based upon this RLCR and subject to concurrence by the CDPHE, the B560 cooling tower is considered to be a Type 1 facility.

Upon your approval, please forward this report to the CDPHE for their review and concurrence. Please notify Kaiser-Hill, within the 20 days required per the DOE/K-H contract, when you transmit this document to CDPHE. If you have any questions, don't hesitate to call me or Duane Parsons at extension 6458.
