TRANSMITTAL OF THE REVISED SUPPLEMENTAL RECONNAISSANCE LEVEL CHARACTERIZATION REPORT (RLCR) FOR THE 771 STACK, ANNEX AND OUTBUILDINGS, REVISION 2, BUILDING 771 PROJECT - JLS-009-01

Provided for your review and approval is the subject revision for the Building 771 Closure Project. The Supplemental RLCR dated March 19, 2001 has been revised to be consistent with the 771 DOP and informal comments received from Dave Kruchek, CDPHE, May 17, 2001. To be consistent with the DOP, the Building 771 Exhaust Tunnel and Stack are now reclassified as Type 3 Facilities in the RLCR. Additional edits have been made regarding beryllium characterization and the addition of Attachment "AG," which details the location of the beryllium surveys.

I would appreciate your review and approval by COB June 29, 2001. Once approved, please forward a copy to the Colorado Department of Health and Environment for their concurrence. If you have any questions, don't hesitate to call me at extension 5797.

TAM SCOTY for JS.
