

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: January 7, 2004

Site Contact(s): Dyan Foss
Phone: 303-966-7577

Regulatory Contact: Edd Kray
Phone: 303-966-2115

Agency: CDPHE

Purpose of Contact: Lead collar in the wall of Room 443 of Building 776

Discussion

Appendix I of the 776/777 Decommissioning Operations Plan indicates that, "Chemicals and hazardous substances are removed" prior to initiating demolition. In Room 443 of Building 776, there is a 6,000 pound lead collar in the wall shared with Room 430. This collar poses no hazard in the wall, but lead is considered a hazardous substance.

There are numerous physical hazards to the workers associated with removing this collar, primarily related to hoisting and rigging such a heavy object. As a result, the 776/777 CDPHE Building representative was approached about leaving this item in the building and removing it during the demolition activity with a crane. The 776/777 CDPHE Building representative agreed to this approach and will be involved in the demolition strategy for this item using the consultative process.

As indicated in Appendix I of the 776/777 Decommissioning Operations Plan, the demolition contractor will prepare a Contractor Demolition Plan before initiating demolition activities. This demolition plan will detail how the lead collar will be marked and removed from the facility. At a minimum, the lead collar will be painted with a fluorescent paint and the words "lead collar" will be written on the adjacent portion of the wall. The demolition plan will include where in the sequence of demolition that the collar will be removed and specify direct loading into a waste container.
