Minutes:

At the initial meeting on Feb. 10, 1998 the purpose and need for the STARR meeting was discussed. A listing of documentation included in the 779 Administrative Record as of that date, was reviewed and compared against a preliminary list of documentation recommended for inclusion in the Administrative Record. Attendees were asked to review the preliminary list and submit comments or recommendations for changes, following which a revised list would be submitted for review. Following receipt of comments, a revised list was prepared and submitted for review on March 3, 1998.

On March 13, 1998 a conference call was set up to discuss the revised list, determine if complete, and assure that the documentation recommended for inclusion into the Administrative Record was in fact presently included. Agreement with the content was reached, with the addition of two documents (Comments on 779 Cluster Integrated D&D Schedule Accelerated Sitewide Action Plans Phase II Volume 1 Draft May 21, 1996 and Independent Waste Assessment for Building 779, December 1997). It was also verified by Laura Brooks, that all documents, with the exception of the two recommended additions were included in the current Administrative Record. An action was accepted by John Whiting and Laura Tyler to ensure the two additional documents get incorporated into the Administrative Record.

The STARR meeting concluded with consensus that the Administrative Record index was complete.
