DRUMS OF SOILS CONTAMINATED WITH VOLATILE ORGANIC COMPOUNDS (VOAs) FOR LOW TEMPERATURE THERMAL DESORPTION PILOT TEST - SGS-552-94

Action: None

Pursuant to your request, Operable Unit (OU) 2 is searching the database for three three gallon drums that have shown significant concentrations of VOAs. Since these drums have been in storage for over one year it is possible that the concentrations may be less than what the sample results indicate. Additional drums of VOA contaminated soil will be available from Surface Water (SW) 59 sump maintenance. The soil from SW 59 will be available in approximately one month.

It is our understanding that the drums will be needed in early January. A short list of the existing drums and their sample results will be provided within a few days so that you may select the three most suitable for your needs and subsequently sample the contents. It is also our understanding that the drums or the soil will not be returned to OU 2.

If you have any questions, please call Pete Laurin at extension 8702.

S.R. Keith

for S. G. Stiger, Director
Environmental Restoration Program Division
