**Re: Final East Trenches Plume Project Closeout Report FY 1999
(February 2000)**

Dear Mr. Legare:

EPA has reviewed the above referenced document and finds it to be acceptable as a summary of the installation and construction of the East Trenches Plume groundwater collection and treatment system during the interval of February 1999 to September 23, 1999. Therefore, this document is acceptable as a construction closeout report and needs no revision. It is understood that effectiveness of the system will be reported separately.

If you have any comments or questions regarding these matters, please contact Gary Kleeman at 303 312-6246.

Sincerely,

Tim Rehder ^{for}
Tim Rehder, Manager
Rocky Flats Project
