Dear Mr. Baughman:

The Department of Energy, Rocky Flats Office (DOE/RFO), hereby withdraws the submission requesting a change to interim status for a waste pile for Rocky Flats Plant (RFP) Unit 15B, Mixed Waste Storage Area, 904 Pad.

Attached, please find the February 1994 Update to the March 1993 750/904 Pad Compliance Plan. The February 1994 Update analyzed the impacts to the original study resulting from the changed conditions on the Solar Ponds Program (i.e., storage of sludge in tanks, deferral of sludge cementation). The update investigation resulted in a recommendation to repack the waste on the 904 Pad into DOT approved containers with a subsequent stacking of these containers to make maximum use of the available tent space. It is an effective approach to resolve the container inspectability issue for the Pad.

We believe the attached plan meets all CDH requirements and will serve to resolve a mutual compliance concern. We look forward to your review and comments. If you have any questions, please contact me at 966-7846 or Steve Howard at 966-3040.

Frazer Lockhart, Manager
RFO Solar Ponds Program
