Ken,

During the recent preparations for the Kaiser-Hill assessment for readiness, I reviewed the draft Site Specific Health and Safety Plan for the Removal at Trench-1 IHSS 108. I felt compelled to share with you my conclusion, this document is exemplary. The breadth, presentation, and organization are particularly noteworthy. The overall quality of the document is indicative of strong dedication, attention to detail and a broad based knowledge. It would be a joy to read and assess more documents of this calibre.

Jill Bruse
Kaiser-Hill Assessment Team Lead
