RECONNAISSANCE LEVEL CHARACTERIZATION REPORT FOR GROUP A FACILITIES
– JTS-021-99

Enclosed please find two copies of the Reconnaissance Level Characterization Report. This Report characterizes the physical, chemical and radiological hazards associated with the Facilities, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization, and presents the data quality assessment, verification and validation of results. Based upon our results, some hazards are identified in Buildings 551, 662, Tent 10 and the 709 Cooling Tower, which classifies them as Type 2 Facilities. These facilities will require preparation of a decision document, which will discuss plans for disposition. The remaining facilities, Buildings 910 and Tent 11, are classified as Type 1 and can be free-released upon your concurrence and the Colorado Department of Public Health and Environment (CDPHE).

Please forward a copy of the report to the CDPHE for their review and concurrence.

You can reach me at extension 5797 if there are any questions concerning this matter.

Jeff Stevens
