Mr. Bruce Peterman
Operable Unit Project Manager
EG&G Rocky Flats, Inc.
P.O. Box 464
Golden, Colorado 80402-0464

Subject: Draft Phase I RFI/RI Work Plan, Operable Unit 8 - 700 Area
DOE Rocky Flats Plant Site (ASI Project No. 208.14)

Dear Mr. Peterman;

Advanced Sciences, Inc. (ASI) is pleased to submit five copies of Volumes I and II of the subject completed Work Plan for your review and DOE authorization for submittal to the appropriate regulatory agencies in accordance with the Interagency Agreement for Operable Unit (OU8) at DOE's Rocky Flats Plant, Colorado. This Plan has been prepared in accordance with the scope of work and terms of Basic Order Agreement (BOA) 215362SH.

This iteration of the Work Plan includes ASI's responses to the DOE Project Manager's verbal comments (discussed on April 23) regarding the Draft-Draft iteration submitted on April 20, 1992. This version of the Plan includes substantial changes to the previous Draft-Draft resulting from changes in text, organization, and numbering of the contents pursuant to EG&G Rocky Flats Plant Manual 3-21000-ADM. As such, all of the text figures and tables required renumbering in consecutive order of appearance in the text. ASI has attempted to identify and make all editorial corrections throughout the text, however, it is possible that some changes may have escaped our identification. These will be corrected in the next iteration following the agency review period. Included in this Draft are ASI's incorporation of EG&G's written comments received as of April 27, 1992. Usage of the HPGe as a site investigation method has been included along with EG&G's Quality Assurance Addendum for OU8.

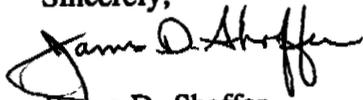

On or before close of business May 6, 1992, ASI will provide to EG&G twenty additional copies of the Draft Work Plan for use and distribution. These copies will include Section 11.0 REFERENCES, which is unfinished and could not be provided today. In addition, all color fold-out maps will be provided at that time. Inserts will be provided to replace figures included in the copies submitted today.
