INTEROFFICE MEMORANDUM

DATE: November 28, 2000
TO: Tom Scott, K-H, Bldg 130, X2093
FROM: Karan North, K-H/ESS, T130C, X9876 *kn*
SUBJECT: ESS DETERMINATION FOR T331A EXTERIOR SAMPLING - KN-189-00

I have reviewed the project to sample exterior surfaces of T331A as discussed in the Environmental Checklist.

The following environmental compliance issue is noted for this project. The work will apparently conduct lead-based paint and radiological sampling; however, the roof (coupon sampling) may also have asbestos containing materials (ACM). Before sampling the trailer roof, the project should ensure that ACM will not be disturbed.

With regard to NEPA documentation, I find that Site Standing Categorical Exclusion (CX) RFFO/CX 12-99 (B3.1), for site characterization, monitoring, and general research building demolition and disposal, provides coverage for this project as described in the Environmental Checklist. No further NEPA review or documentation of the project is necessary and, from a NEPA perspective, the project may proceed.

If the scope of the project changes, please contact me so that we can review the changes for compliance. Please contact Niles Jokela (X8132) if you have questions or need additional information.
