INFORMATION REGARDING RADIOACTIVELY-CONTAMINATED REGULATED
ASBESTOS-CONTAINING MATERIAL DESTINED FOR THE NEVADA TEST SITE (NTS) -
TGH-037-96

Please find enclosed the information regarding radioactive contaminated regulated asbestos
containing material destined for NTS. This information is being transmitted at the request of
E. Frank Di Sanza, Acting Director, Waste Management Division, DOE, NV.

This information will be used by NTS to determine the complex wide volume of radioactive
asbestos to help design and construct a disposal cell for this waste.

As requested by Di Sanza's letter, this information has been faxed to NTS and requires no further
action on your behalf.

If you have any questions regarding this request or matter, please contact Colburn Kennedy of
my staff at extension 7543.

T. G. Hedahl

INFORMATION REGARDING RADIOACTIVELY CONTAMINATED REGULATED ASBESTOS CONTAINING MATERIAL DESTINED FOR THE NEVADA TEST SITE

Discussion and/or Comments:

The letter is being sent only to officially close-out a request received from NTS and to officially transmit the completed form Estimate for Radioactive Waste Containing Asbestos Material Destined for the Nevada Test Site for the Rocky Flats Environmental Technology Site. This form was completed as requested in a memorandum from NTS dated February 1, 1996. The completed form has already been telefaxed to NTS as requested in the NTS memorandum.

**REQUEST FOR INFORMATION REGARDING RADIOACTIVELY
CONTAMINATED REGULATED ASBESTOS CONTAINING MATERIAL
DESTINED FOR THE NEVADA TEST SITE**

The DOE Nevada Operations Office is currently petitioning the state of Nevada for permission to accept radioactive waste containing asbestos material at the Nevada Test Site including from off-site facilities. The waste may not come from a site regulated by the Nuclear Regulatory Commission (i.e., power plants) unless the waste generated is considered a defense-related waste.

Asbestos containing waste is defined as waste that is loaded with or containing more than one percent asbestos. Asbestos is defined as containing one or more of the following: chrysotile, crocidolite, amosite, anthophyllite, tremolite, or actinolite. In addition, this waste must be Regulated Asbestos Containing Material generated from abatement or demolition.

In order to complete the petition and to design and construct a disposal cell, this office requests that you complete the enclosed form. The form must be telefaxed to this office by February 16, 1996.

If you have any questions or need additional information, please call Carol A. Shelton, of my staff, at (702) 295-0286.

**E. Frank Di Sanza, Acting Director
Waste Management Division**
