Discussion

A meeting was held with Elizabeth Pottorff (CDPHE) to discuss sampling locations at IHSS Group 600-2. Existing data at two sediment sampling locations were reviewed along with Historical Release Report information. The Remedial Action Decision Management System (RADMS) was used to determine statistical sampling locations. CDPHE requested that existing groundwater data be taken into account when developing sampling locations and PCOCs.

CDPHE agreed to the randomly-generated statistical sampling strategy, radionuclide, SVOC, and metal analyses from 0.0 to 0.5 feet, and VOC and radionuclide analyses from 0.5 to 2.5 feet.
