RE: Reconnaissance Level Characterization Report (RLCR) for Building 790 – Concurrence

Dear Mr DiSalvo

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR for Building 790, Revision 0 dated April 15, 2003. Based on the information contained in the RLCR we are hereby concurring with the determination that Building 790 is a Type 1 Facility

Although we are concurring that this is a Type 1 facility, we are concerned with a possible inconsistency between statements in Section 7 and 8, which indicate that B790 does not contain nor will there be hazardous waste generated during the demolition of this building, and Section 4.3 which states that B790 contains "Lead shielding" The Lead shielding would be considered a hazardous waste So, even though it is also indicated that this Lead shielding will be removed prior to demolition, particular attention needs to be paid during demolition for unexpected Lead shielding that may not have been removed prior to demolition This might include doors, windows, walls, floors, etc

This and any other issue that may be relevant to building demolition, such as disposition of below grade structures, are expected to be addressed utilizing the consultative process

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328

Sincerely,

Steven H Gunderson
