

# ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE ER REGULATORY CONTACT RECORD

**Date/Time:** 10-21-03/ 1:00

**Site Contact(s):** Annette Primrose  
**Phone:** 303 966-4385

**Regulatory Contact:** David Kruchek  
**Phone:** 303 692-3328

**Agency:** CDPHE

**Purpose of Contact:** Lead Exceedance at B444

### Discussion

A lead exceedance in the sub slab soil was found during the recent UBC investigation at B444. This soil sample was collected in an area where the floor was painted yellow. Subsequent analysis of the paint determined that this is lead-based paint.

The lead exceedance in the soil is potentially a result of cross contamination of the soil by the paint during drilling through the slab. Therefore, a second sample will be collected immediately adjacent to the first sample location. Prior to drilling, the paint will be removed from the concrete slab. If the sample results from the second sample are similar to other sample results in the area, then the first sample results will be determined to be a result of cross contamination during drilling.

If the sample results from the second sample are still several times those seen elsewhere, then additional actions will be considered. It is not anticipated that an RSOP Notification will be required at this time.

**Contact Record Prepared By:** Annette Primrose
