

Type 1 Facility Closeout Report

Section A. Facility Data	
Facility No.	215D
Facility Descriptor:	Evaporation Distillated Storage Tank
Project:	RISS
Date of Demolition:	09/24/03
Additional Information:	Attached
<i>(Must include information on environmental releases and conditions of site at turnover to Environmental Restoration)</i>	

Section B. Final Characterization Data	
Reconnaissance Level Characterization Report <i>(concurrence received)</i>	N/A – tank was characterized by Release Evaluations #030502-T130I-001 and #031028-T130I-002
In-process Characterization	N/A
Pre-Demolition Survey Report <i>(approval received)</i>	N/A
Post-Demolition Survey Report <i>(as necessary)</i>	N/A

Section C. Waste Data (complete categories as appropriate)	
<u>Sanitary Disposal</u>	
Disposal Site:	Republic Front Range Landfill
Waste Volume (m ³):	500
Waste Weight (tons):	122.7
Additional Information:	
<u>Hazardous Disposal</u>	
Disposal Site:	N/A
Waste Volume (m ³):	N/A
Additional Information:	N/A.
<u>TSCA Waste Disposal (other than ACM)</u>	
Disposal Site:	N/A
Waste Volume (m ³):	N/A
Additional Information:	N/A
<u>Asbestos Waste Disposal</u>	
Disposal Site:	N/A
Waste Volume (m ³):	N/A
Additional Information:	N/A
<u>Low-Level Waste Disposal</u>	
Disposal Site:	N/A
Additional Information:	N/A
<u>Low-Level Mixed Waste Disposal</u>	
Disposal Site:	N/A
Additional Information:	N/A
<u>Recycled Material</u>	
Disposal Site:	N/A
Additional Information:	
<u>Property Disposition</u>	
Receiver Locations <i>(major items only)</i> :	N/A
Additional Information:	

Section D. Approvals	
Kaiser-Hill Project Manager <u>S.H. NESTA</u>	11/15/04
Name/Signature	Date

Additional Facility Information

215D was constructed in 1952, and was an above ground 500,000 gallon water storage facility. The tank was served by pipes entering 215D from B928. The service pipes remain capped in B928, as does an underground pipe that heads east from the site of 215D at an estimated depth of 5 feet. The attached map shows the location of the utility disconnects (B928) and the eastbound underground water pipe.

The entire above ground 215D structure was removed during D&D activities, and sent offsite for disposal at Republic Front Range Landfill in Erie, CO. As part of the D&D, the concrete slab and soil was removed to a depth of 4 feet. During slab/soil removal, the D&D crew noticed a petroleum odor and halted work until samples could be taken from the area. The sample results indicated that TPH was below the regulatory limit of 5000ppm, and work resumed. 215D is not associated with an IHSS, UBC, or PAC, and there are no additional contamination concerns related to 215D soils. The pipe system, remaining utilities (electric), and final site grade will be addressed when B928 and 215C undergo D&D.

Tank 215D

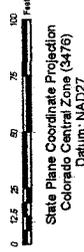

Standard Map Features

-  Buildings
-  Demolished Buildings
-  Paved Roads
-  Lakes
-  Streams
-  Railroads
-  Dirt Roads
-  Trails
-  Fences
