

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: July 27, 2004 / 11:15

Site Contact(s): J. R. Marschall
Phone: 303-966-2372

Regulatory Contact: Dave Kruczek
Phone: 303-692-3328

Agency: CDPHE

Purpose of Contact: Demolition Procedure for Building 964

Discussion

In agreement with Dave Kruczek the following tasks will be followed in the order as written for demolition of Building 964:

1. The floor of the building will be washed and RCRA closed. The plastic covering will be left in place on the walls and across the doors until the floor is cut into pieces (see #4 below).
2. The west side metal siding will be removed such that the plywood sheathing under the metal siding can be surveyed and the PDS completed. The metal siding will be disposed of as Low-Level Waste (LLW).
3. After the PDS is completed the PDSR and RSOP Disposition Notification will be submitted to DOE/CDPHE and the PDSR approved before the remainder of the work is done.
4. The floor of the facility will be cut into pieces with the perimeter cut as close to the interior wall as possible. The pieces, except the perimeter, will be removed and put in LLW containers with the shell building in tact. Cutting will be done with a concrete saw with water to keep the surface wet and a wet vacuum cleaner will be used to pick up the water as the saw cuts the floor.
5. The contaminated metal siding on the south side of the building, the roof gutter and down spouts, and the netting material on the south eave will be removed and put in LLW containers.
6. The remainder of Building 964 will be demolished with conventional equipment and disposed of as sanitary waste.
7. The perimeter of the building floor will be picked up and put in LLW containers.
8. The foundations will be removed and surveyed prior to disposal.
