RE: APPROVAL, DRAFT, ENVIRONMENTAL RESTORATION, RFCA STANDARD OPERATING
PROTOCOL FOR ROUTINE SOIL REMEDIATION, FY04 NOTIFICATION #04-17, IHSS GROUP 700-6

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the Division) hereby approves the subject notification to proceed with the excavation of contaminated soils identified to date. Excavation must continue until confirmation samples yield satisfactory results for all constituents.

This approval is being granted prior to verification and validation of the full investigation data set and the availability of associated quality assurance/quality control data. The expedited construction of a rail spur to facilitate cost-effective demolition and disposal of area building debris makes the early approval of this Notification necessary. Any excavation within other IHSSs of the group, that becomes necessary as additional data are evaluated, will be addressed through the consultative process and a Regulatory Contact Record(s).

We look forward to confirming that changes to the confirmation sampling effort and proper application of the hot spot methodology are reflected in the final document. If you have any questions regarding this correspondence, please contact me at (303) 692-3367, Harlen Ainscough at 303-692-3337, or David Kruchek at 303-692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
