Additional Facility Information

Building T891B was an approximately 980 square foot modular trailer acquired in 1993. The structure was corrugated metal siding with wood skirting. The entrances had wooden stairs leading to a wooden enclosure.

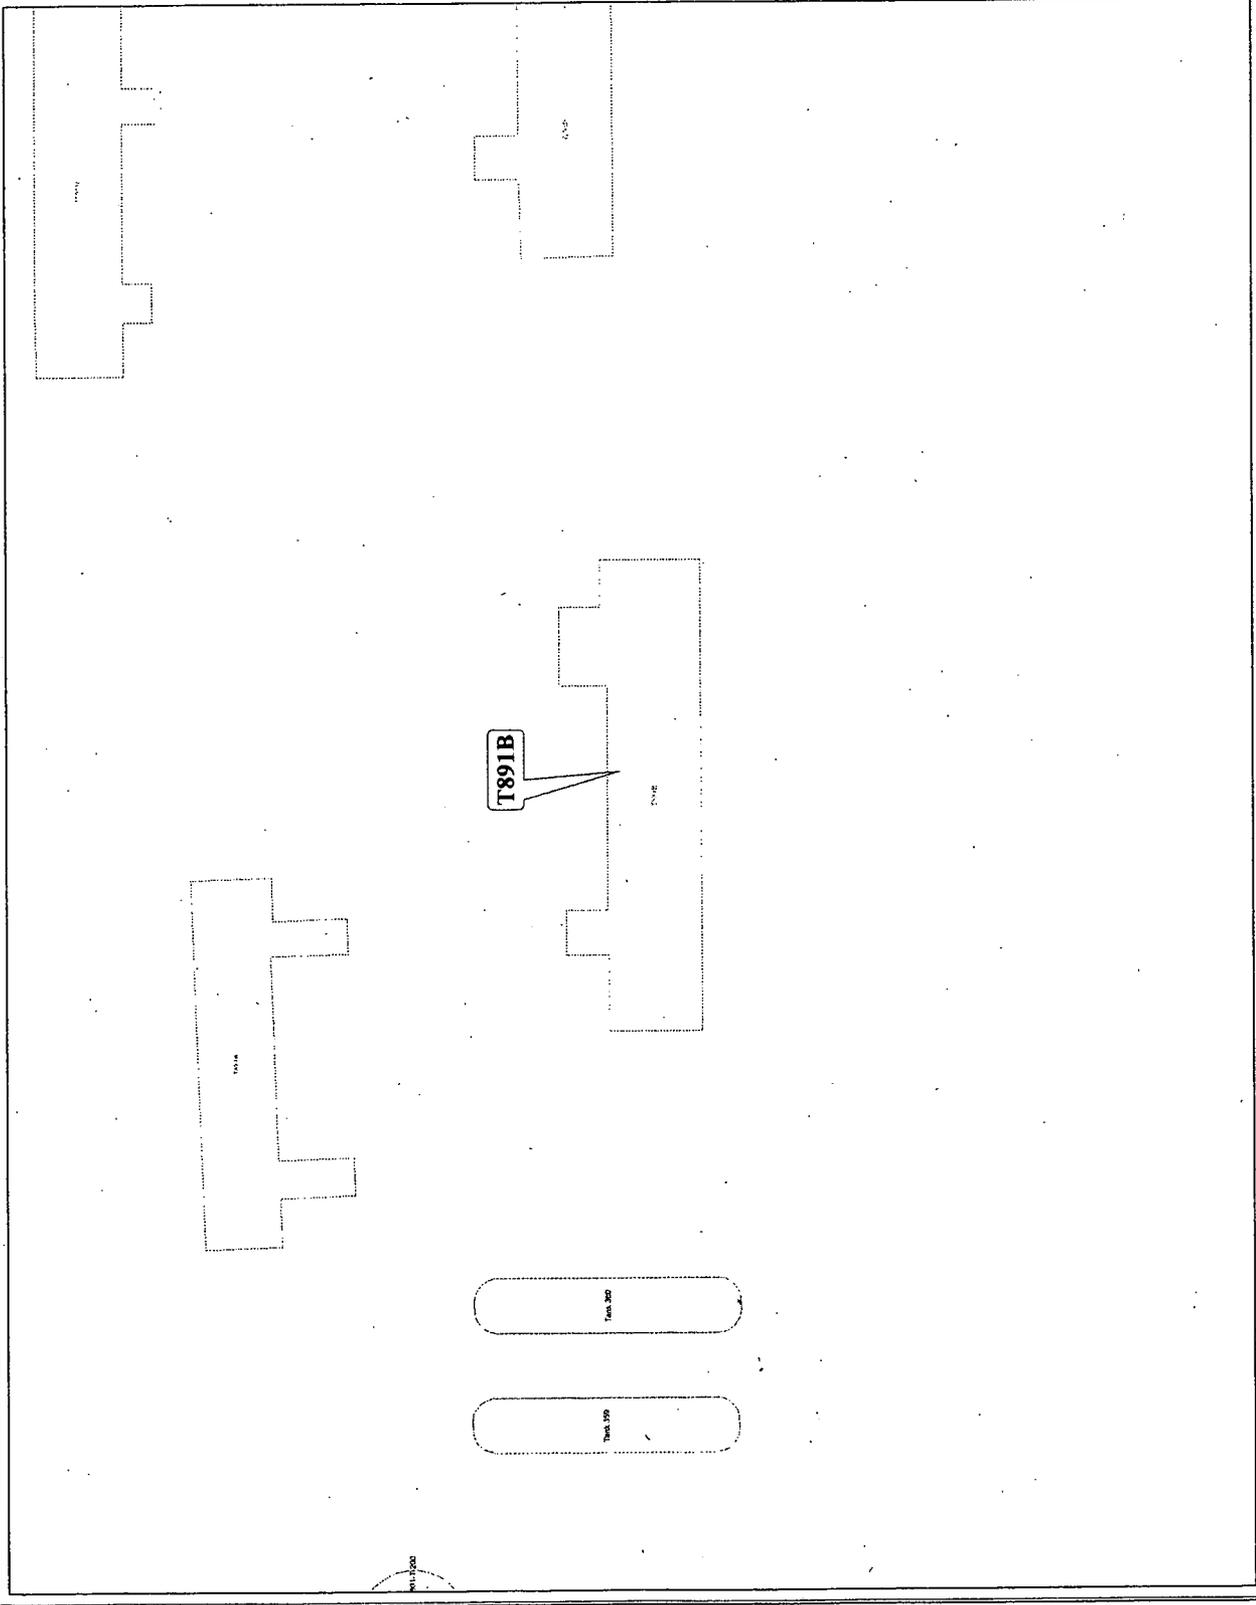

Building T891B had the following utilities: electrical, and fire protection was provided by wall mounted fire extinguishers.

The entire T891B structure was removed during D&D activities, and sent offsite for disposal. The utilities were disconnected and removed to at least three feet below final grade as indicated on the attached map. There are no remaining structural components, utility lines, or parts of the foundation. The buildings are not in an IHSS or PAC therefore no soil sampling is required.
