Mr. Fraser Lockhart
DOE/Rocky Flats Office
P.O. Box 928
Golden, CO 80402-0928

Dear Mr. Lockhart,

The Colorado Department of Health, Hazardous Materials Waste Management Division, "the Division", has reviewed the revised Phase III RFI/RI Workplan and Quality Assurance Addendum for Operable Unit (OU 1), 881 Hillside, submitted April 5, 1991 and the Environmental Evaluation Plan for OU1 submitted June 7, 1991. The Division's major concerns were inadequacies in the environmental evaluation, treatability studies and QA Project Plans. Since the submittal of the above documents the Division has received site wide treatability studies and standard operating procedures which are to take the place of QA Project Plans. The Environmental Evaluation Plan has been completely reworked and replaced by the Phase III RFI/RI Environmental Evaluation Workplan June 1991.

It is the Division's position that the remaining concerns we have with the Standard Operating Procedures do not merit withholding approval of the above Workplan. The Division approves the Phase III RFI/RI so that commencement of field activities may begin. OU1 is designated a joint EPA and CDH lead under the IAG. This letter transmits only CDH approval. If you or members of your staff have questions regarding this approval, please contact Patricia Corbetta at (303) 294-1071 at EPA or Noreen Matsuura at (303) 331-4920 for CDH.

Sincerely,

Noreen Matsuura *ln*
