Gentlemen

We are transmitting copies of the Operable Unit No 1 (OU 1) 881 Hillside Draft Corrective Measures Study/Feasibility Study (CMS/FS) report This submission completes the milestone for this draft report due August 25 1994 per the Interagency Agreement (IAG)

For the purposes of this report, we have assumed that the OU 1 surficial soils have been administratively transferred to OU 2 903 Pad Mound and East Trenches per our letter of June 30 1994 (Ref 94-DOE 07024) We have further assumed that the assessment of surface water and sediments in the South Intercept Ditch and in Woman Creek have been deferred to OU 5 Woman Creek as discussed by the Environmental Protection Agency's (EPA) letter of January 12 1994 The document also proposes that OU 1 will be designated as a Corrective Action Management Unit (CAMU) under the Colorado Hazardous Waste Act

Subsequent to this submittal we will transmit a detailed responsiveness summary outlining how your received comments for Technical Memorandum (TM) No 10 (Development of Remedial Action Objectives) and TM 11 (Development and Screening of Remedial Action Alternatives) were addressed in the CMS/FS report

We expect your comments on this document by October 7 1994 per the agreed IAG schedule This schedule is outlined in the joint EPA and Colorado Department of Public Health and Environment's letter dated February 25 1994

Please direct any questions to Scott Grace at 966-7199

Sincerely

*Steven W Slaten*
