SUBJECT Comments on DOE EA-0496, "Final Surface Water Interim Measures/Interim Remedial Action Plan/Environmental Assessment and Decision Document for South Walnut Creek Basin, Operable Unit No 2"

TO Steve Nesta
NEPA Division
EG&G Rocky Flats, Inc

Please find enclosed DOE comments on document DOE EA-0496 entitled, "Final Surface Water Interim Measures/Interim Remedial Action Plan/Environmental Assessment and Decision Document for South Walnut Creek Basin, Operable Unit No 2", dated March 8, 1991

This review is the result of a telephone conversation that Bruce Thatcher of my staff had with Laura Frick a few weeks ago. During the conversation, Ms Frick indicated that the previously stated document for OU2 would be the model for integrated NEPA/CERCLA (specifically RI/FS/EA) documents at the RFP. Thus, DOE has reviewed this document for its adequacy in integrating NEPA into CERCLA

Note that our comments fall into three categories

- 1) General comments regarding NEPA/CERCLA integration for the OU2 IM/IRA/EA document.
- 2) Specific comments on the OU2 IM/IRA/EA document.
- 3) General review of the OU2 IM/IRA/EA document.

DOE requests that comments under categories no 1 and 2 above be reviewed and responded to in writing by June 28, 1991. In addition, DOE will be available to discuss both comments and response to comments within one week of receipt of the response from EG&G. Please note, however, that the above-referenced document is final and that we are not requesting that modifications be made. These comments apply to future documents only

ADMIN RECORD
