Operable Unit 2 Surface Water IM/IRA Phase II Treatability Report

Robert Benedetti, Associate General Manager
Environmental Restoration Management
EG&G Rocky Flats, Inc.

The Operable Unit 2 (903 Pad, Mound, East Trenches) Surface Water Interim Measure, Phase II Field Treatability Study Report, is due to EPA and CDH, as an Interagency Agreement (IAG) Enforceable Milestone, July 13, 1993. In the May 20, 1993, EPA/CDH letter granting an extension to July 13 for the subject deliverable, they made it quite clear that no further extensions would be granted, except for **good cause**.

As we discussed in the meeting held with you and your staff on June 9, 1993, we think the report can be prepared and submitted on time. As agreed in this meeting, the target date for the next working draft of the report is June 28, but no later than July 7, 1993. We remind you of the significance of this report. Recommendation, based on the risk assessment and lack of contaminants, to discontinue the IM/IRA or to not collect from SW-61 and/or SW-132 has a significant future cost savings for the Environmental Restoration program. Therefore, it is important to submit an adequate report and meet the IAG milestone date. My staff will provide you with comments of the next working draft the day following delivery.

If you have any questions, please contact Scott Grace of my staff at extension 7199.
