SUBJECT: TECHNICAL EVALUATION FOR RIEDEL ENVIRONMENTAL SERVICES PROPOSAL,
ASC 89882WS MOD. 3 - DWP-004-91

The Riedel Environmental Services (RES) proposal is in response to the revision to the Statement of Work (SOW) for the OU 2 - South Walnut Creek Granular Activated Carbon (GAC) Treatment System. A technical evaluation has been completed and the following remarks are offered.

General Remarks

In preparing the Statement of Work for this task, the RPD staff developed a cost estimate (see attached). The cost proposal from RES is about 50 percent below our cost estimate and is considered a fair and reasonable price. The RES proposal is compatible with the EG&G SOW, and the technical portion of the RES proposal offers sufficient detail to provide an acceptable product.
